

A close-up photograph of a glass being poured with golden-brown cooking oil into a metal bowl. The oil is captured mid-pour, creating a dynamic, flowing shape. The background is a soft, out-of-focus green and yellow gradient.

Cooking Oil Management

*A Reliable, Responsible Way to
Manage your Cooking Oil*

About Arrow Oils

Together we give you unbeatable service

Arrow was established in 1992, and started life as an association of family businesses. We are a nationwide company made up of a consortium of independent UK oil collection depots, making it the largest vegetable oil management business in the country.

We have a vested interest in making sure that together we give the best possible service. Arrow gives traditional family business values combined with the reach and resources of a national corporation.

All depots are fully insured and licensed to meet the highest government standards. The depots have been awarded the International Sustainability & Carbon Certification (ISCC) by the European Commission.

What We Do

Unique Nationwide Oil Supply and Collection Service

Through our strategically placed depots we give you a premium supply and collection service anywhere in the UK.

One central office means you only ever need make one phone call. Our flexible service is tailored to suit your needs and collections take place weekly, fortnightly or as required. We offer competitive pricing and central billing.

We arrange fresh oil supplies from processors direct to your door. We operate a centrally organised fleet of trucks offering a total oil solution to the catering trade.

We operate 3 purpose-built recycling plants taking care of used oil and ensuring all the used oil and packaging is recycled.

Arrow Edible Oil Management

Recycling your used cooking oil

Our nationwide service is at the leading edge of used cooking oil Management services and solutions in the UK.

We are always looking for ways to improve our recycling of materials that are collected and investing in the future.

We can supply waste bins and tanks and systems. We have launched a new **'fatboxx' specialised container** which allows easy transport and safe storage of waste cooking oils and fats.

National contracts and local regional customers are all dealt with the same dedicated and professional care.

We have more than 100 vehicles collecting over 200,000 litres of used oil every week.

Going Green Environmental Issues

Protecting the environment now and for the future!

Arrow provide a legal, safe and environmentally responsible disposal service for your used cooking oil.

We convert your used oil into renewable fuel to help reduce carbon emissions.

We advise you on the right oil for the job to save you money.

Effective management of fresh and used oils will reduce your carbon footprint.

Full recycling service of waste packaging.

Waste Transfer Notes to prove you're disposing of your oil responsibly.

Arrow is working on several CHP (Combined Heat and Power projects) to provide energy from waste cooking oil in an efficient and environmentally-friendly way.

One Centre Means One Call

Arrow provide a total edible oil management solution

Our central office will liaise with your local depot to take care of everything for you. Wherever you are you only need to make one call.

Our friendly customer services team will answer your waste management questions and advise you on suitable products.

New improved emergency service for any serious spills that need attention.

Cooking oil management and oil care training available.

Full statistics on your waste collections with relationship to the carbon footprint savings you are making in your business.

We provide monthly updates for your business on the used cooking oil we have collected enabling you to plan for the future and save money.

Commercial Accessories

Equipment relating to cooking oil is available

The specialised wheelie bin container called a **'Fatboxx'** are easy to move and safe.

They are translucent so the oil level is always visible. They have hermetically-sealed lids that make the **'Fatboxx'** virtually spill-proof with robust rounded bottom and stable tail ensure good balance.

Free blue barrels for storing your used cooking oil are also available at all our depots nationwide.

We have **spill kits** and spill equipment available to buy and to use.

Funnels for kitchen use on decanting waste oil back into drums available.

You can return your used cooking oil **back in the original tins or plastic containers.**

- Other large waste and recycling companies

Recycling Of Used Cooking Oil

Recycling to bio fuels

The raw materials used are soya bean, rape seed, sunflower seed, palm nut etc. These are processed into cooking oil.

This is then transported to factories, hotels, schools, restaurants, Pubs and many other businesses to be used in frying and cooking food mainly.

Arrow collect the used cooking oil on a regular reliable nationwide basis with its own fleet of vans and trucks.

The used cooking oil is then cleaned filtered and processed into a biofuel for use as vehicle fuel or for power and energy generation.

Quite Simply Your Food Will Be Better

Exclusive and unique oil management and filtration system

On-site oil filtering, fryer hygiene and oil management

We understand the pressures of running a fast paced kitchen **so we work with FiltaFryPlus** who have innovated a complete cooking oil & fryer care service.

By filtering cooking oil on-site we can deliver optimum frying performance and cooking oil lifetime so you can deliver finest fried food.

Arrow provide a filtration service **working with 'FiltaFryPlus'**.
