Choosing the Right Range

It's important to choose the right range for your outlet.
Follow these simple rules to help you...

1

If you are new to craft start with well-known brands such as Purity, Brewdog, Sadler's, Wild beer etc...

2

Ensure you have a broad selection from Golden Beer, IPA, to more hoppy styles or even stouts.

3

It's not just about beer. Don't forget ciders have a part to play too, as such we recommend brands such as Hogan's, Pearson's & Weston's to name a few...

4

Consumers will trade up for the right product, however ensure you have a balanced price ladder. Large gaps between your core ranges and your craft selection will stop consumers trading up.

5

Display your range prominently to make sure your customers know what you have, hidden products on bottom shelves or in a dark corner will not be conducive to sales.

6

Remember some of your customers may not know as much about beer/cider as you. Rather than just having a long list of products offer some recommendations of beers or ciders that can act as a simple gateway into craft. You may consider pairing certain product with foods to push your customers to make more formal choices.

7

Ensure you have a mixed range of formats to address every shoppers need for example; single cans (ideally merchandised in a chiller), 330ml, 500ml, oversized products e.g. kegs

Craft Beer Styles

Light, smooth and refreshingly carbonated, the ultimate thirst quencher on a hot day. Craft lager is an unbeatable experience.

Dry and aromatic with plenty of hop flavour, it's the traditional taste of Britain.

Aromatic and fruity, less carbonated than lager and generally drunk warmer, there's no end to the variety from golden or amber to dark.

Originated from ales brewed during the cooler months in Wallonia, the French speaking region of Belgium. Generally highly carbonated, fruity and spicy.

Hop-forward, with big fruity or spicy flavours, pale in name, but never in taste.

Originally made in England for export to India, a little stronger than pale ale, but equally big on flavour, often citrusy or tropical fruit, a great beer for lovers of Sauvignon Blanc wine.

Originally thought of as 'nourishing' brews, these are dark, complex, and often spicy and meant for sipping slowly. They give spicy red wines like Shiraz a run for their money.

Brewed with malted wheat and barley, they're effervescent, silky in the mouth and often cloudy - the perfect taste of summer.

Craft Ciders usually have a high juice content and a dry, astringent finish. Made with traditional techniques and modern packaging.

'Can' you follow the trend?

The ultimate conditions for beer to be kept fresh, requires protection from its two archenemies; sunlight and oxygen.

OXYGEN

Oxygen is absolutely essential for us humans yet calamitous for beer. It creates an array of undesirable 'off' flavours. In terms of picking up unwanted oxygen, cans once lagged behind bottles but that's no longer the case thanks to advances in canning technology and hermetically sealed cans are now considered just as, if not more, reliable.

Canned craft products are bringing more customers into the category.

LIGHT

Cans are considerably more cunning when it comes to keeping light out. Beers are like Gremlins in that they loath light. Over-exposure to UV light reacts with compounds found in hops that unleash an unpleasant aroma. Cans are completely impermeable to such ruinous rays.

So forget the boring 4 packs of cheap can beer that once stood proud in many retailer fixtures, today consumers will look for interesting and colourful 330ml craft cans in chiller fixtures.

Get into the 'Spirit' of things!

First it was beer, now the artisanal spirits boom is in full swing and the UK Spirits market has never been more exciting.

With plenty of innovation and great products many of which are recognised by a multitude of awards don't miss the opportunity to embrace those sales opportunities.

If you need some convincing then look no further than gin. The British gin industry had a record-breaking year in 2015 after 49 new distilleries opened their doors and consumers spent nearly £1bn on their favourite tippie.

Gin has undoubtedly captured the hearts, minds and wallets of the British drinker, who is still on a voyage of discovery, eager to try new styles, and experiment with new brands.

This year we have added a number of exciting new spirits listings to our range.

Drinkers are definitely trading up to the more premium spirits. There's a certain amount of kudos to be had in drinking the artisan and local brands, which tend to be in the higher price bracket. This is especially true when it comes to gin.

We only use the best sweet potatoes; exclusively Scott Farms. The Scott family has been growing sweet potatoes for four generations in the sunshine of North Carolina, USA. Each sweet potato they harvest is hand-picked and shipped to us with the same love and attention that we apply to our distilling methods.

ADNAMS. SOUTHWOLD

We believe that Adnams is the first brewery / distillery in England to be able to produce high quality vodka, gin, whisky and more from 'grain to glass'. We use the same local ingredients to make our spirits – barley, rye, wheat and oats – as we do for our beers. Our distillery, the Copper House, sits within the Adnams brewery in Southwold. It's the most energy-efficient distillery in the UK and also generates water and steam for the brewery, so forming an integral part of our overall sustainable production system. We use the best modern distilling techniques and a small batch process in order to create spirits with exceptional purity, quality and, of course, flavour.

Black Cow Pure Milk Vodka

Pure Milk Vodka™ is made entirely from the milk of grass grazed cows and nothing else. Fresh whole milk makes an exceptionally smooth vodka with a unique creamy character.

BLACK COW

Most vodka is made from grain or potato whereas Black Cow is uniquely made entirely from milk. The milk is separated into curds and whey. The whey, which contains the sugar needed to produce alcohol, is fermented, using a special yeast, into a milk beer. The milk beer is then distilled and treated to Black Cow's secret blending process. The vodka is triple filtered and finished before being hand bottled. The vodka has no additives or flavourings, is gluten free and is suitable for those with lactose intolerance, as all the milk sugar (lactose) has been converted into alcohol.

6 O'clock Gin

6 o'clock gin is a premium gin producing a smooth juniper flavour with a fine balance of botanicals including coriander, orange peel and elderflower.

6 O'clock Sloe Gin

The intense fruit flavour of this traditional classic is achieved by using a high sloe to gin ratio, plenty of sugar, then patiently and slowly maturing for at least 6 months.

6 O'clock Damson Gin

Like Sloe Gin, our Damson Gin is hand made in the traditional way; in small batches, using hand-picked British damsons and a moderate amount of sugar.

Elderflower Liqueur

Made in small batches with hand picked elderflowers, this unique country liqueur captures the flower aroma and retains a fresh springtime taste.

Raspberry Liqueur

This liqueur retains all the unadulterated mouth-watering flavour of raspberries picked at optimum ripeness, capturing their fantastic flavour.

Crème de Cassis

The liqueur has an earthy incense like perfume and taste, and brings to mind summer days picking them. The flavour is very powerful, and will add interest and zing to dishes both sweet and savoury.

FENTIMANS

ESTD 1905

Botanically Brewed BEVERAGES

In 1905, Thomas Fentiman, an iron puddler, was approached by a fellow tradesman for a loan. A deal was struck and a recipe for botanically brewed ginger beer was provided as security. The loan was never repaid so Thomas became the owner of the unique recipe. Thomas' original recipe involved milling ginger roots before tumbling them into copper steam jacketed pans and leaving them to bubble and simmer releasing all their flavour. The finest herbs, natural flavourings, sugar, brewer's yeast and fresh spring water were then added to the liquid which was transferred into wooden vats where it was left to ferment.

As master moonshiners did with corn mash many moons ago, we took the smooth, rich flesh of the sweet potato and used it to bolster a heady mix of botanicals and spices to craft our range of truly artisan sweet potato spirits and liqueurs. We only use the best sweet potatoes; exclusively Scott Farms. The Scott family has been growing sweet potatoes for four generations in the sunshine of North Carolina, USA. Each sweet potato they harvest is hand-picked and shipped to us with the same love and attention that we apply to our distilling methods.

Plum Gin

Sweet, refreshing plum sweetness, with a crackle of peppery juniper. Quite light and creamy.

WE GO TO THE ENDS OF THE EARTH FOR THE PERFECT G&T

Gin is only as good as the tonic it's paired with. While most tonics mask the delicate flavours of gin with artificial sweeteners like sickly saccharin, at Fever-Tree, it is all about taste. In fact, one might say our co-founders, Charles and Tim, are a little obsessed. They've travelled to some of the most remote parts of the world to source the finest natural ingredients – venturing as far as the Congo to find the purest quinine. The result is a tonic like no other, one that sets the complex flavours of gin free.

Arkell's beer is still brewed in much the same way as it was when John Arkell first made it in 1843 and the brewery buildings seem untouched by the passing years. The company has remained true to the principles of loyalty, quality and tradition set down by its founder 170 years ago, but it has also adapted brilliantly to the changing world around it. Arkell's believe that without raw materials of exceptional quality it is impossible to produce first-rate beers. This is why they go to great efforts to source the best malted barley from around the UK and spend the hop harvest every year picking out the finest grown hops for their Ales.

Best Seller

Battledown Brewery

A quiet backwater with delightful terraces of houses dating back to the 1600's is hardly the place you would expect to find a working brewery. Operating a busy thirteen hectolitre brew-plant, our methods are as old as the hills and our ingredients, top quality and locally sourced. As a family run business, we are very proud of our award winning beers, bottled into clear glass as we think it is important to see the beautiful gold and amber colours of the range. The striking Cheltenham SPA brand will grace any table and reflects the Regency elegance of the town.

Bored of industrially brewed lagers and stuffy ales that dominated the UK beer market James Watt & Martin Dickie decided the best way to fix this undesirable predicament was to brew our own. Consequently in April 2007 BrewDog was born. Both only 24 at the time, we leased a building in Fraserburgh, got some scary bank loans, spent all our money on stainless steel and started making some hardcore craft beers. They brewed tiny batches, filled bottles by hand and sold our beers at local markets and out of the back of our beat up old van.

The Honey Beer

Hiver is a dry, crisp and refreshing blonde beer that has been brewed with honey.

The Honey Ale

A light hop bitterness finishes a flavoursome and unpasteurised brown ale.

Hiver was born out of an admiration for London's urban beekeepers and a passion for craft beer. We use urban and rural honey to create an all-British speciality beer that's long matured and unpasteurised. We tone down the hops and support the natural honey flavours with an organic speciality malt. Honey and beer, what's not to love?

RINGWOOD
BREWERY

WE TAKE TWO THINGS SERIOUSLY
AT RINGWOOD BREWERY:
OUR BEER AND LEISURE TIME...

RINGWOOD BREWERY

Ringwood Brewery was founded by Peter Austin in 1978, a man who is revered as "the father of British Micro-brewing".

Ringwood Brewery's first brewhouse was in a former bakery in the old station yard brewing Best Bitter and Fortyniner for a handful of local customers. 1979 saw the production of Old Thumper, which has since become the flagship brew.

In 1986, having outgrown the Minty's yard premises, the brewery moved to its present site, ironically the location of the old Tunks' Brewery which ceased trading in 1821.

Today the brewery is able to produce circa 40,000 barrels of its renowned and distinctive beers. In addition to Razorback, Fortyniner, and Old Thumper, we now brew the blonde Boondoggle and Ringwood Circadian Everyday IPA.

The Teme Valley Brewery was established at The Talbot Inn, Knightwick, Worcestershire in 1997. The brewery has strong ties to the local hop growing industry through it's owner Annie Clift and her family. With three hop growers within a mile of the brewery, we are proud to use only Worcestershire grown hops in our cask and bottle conditioned beers. The English hop varieties we use give the beers familiar, recognisably English flavours.

Titanic Brewery was founded in 1985, now run by brothers Dave and Keith Bott, the ethos is still the same; to brew great beer locally for local people. Using only the very finest ingredients money can buy the opulence shines out of the glass, whether the beer is drunk in one of our pubs, in one of our Blue Riband partner pubs, one of our fabulously supportive local customer's pubs or at home we are looking for the same reaction, "I'll have another one of those please."

Hey we're Tiny Rebel, and welcome to our world. It all began in a garage back in 2008 where me (Brad) and Gazz homebrewed on weekends. We got pretty good at it and as we are beer geeks at heart we always took things that one step further. In 2010 the idea for Tiny Rebel was born, with the result being our official launch in February 2012. Only a year after opening, we took the Great Welsh Beer Festival by storm and won Gold, Silver and Bronze in the Champion Beer of Wales competition. Our latest achievement was winning Gold for the 2nd year running in the Champion Beer of Wales competition.

Fubar

Floral hoppy flavours up front, leading into a dry spicy bitterness on the back.

Cwtch

Citrus and tropical fruit dominate the taste that is backed up with caramel malts that balance the moderate bitterness.

Dirty Stop Out

Dirty Stop Out is a smoked oat stout that has all the characteristics of a heavy night out - complex, dark, with hints of smokiness.

Hadouken

A dedication to the classic finishing move from one of our favourite video games from back in the 90's.

Beat Box American IPA

Big floral notes in this American inspired ale. A little bit of pithy fruit and a little bit of grass come through on the nose, with a lingering bitterness.

Stay Puft Marshmallow Porter

This marshmallow porter has the classic roasty qualities of a proper dark ale, whilst the marshmallow gives it a smooth sweetness, both combining for a delightful, S'mores-like ale.

Cwtch Welsh Red Ale

Citrus and tropical fruit dominate the taste that is backed up with caramel malts that balance the moderate bitterness.

Clwb Tropicana Tropical IPA

It's super juicy and crammed full of fruity hop flavours that will have your mouth watering. Packed full of American hops, amplified by Peach, Passionfruit, Pineapple and Mango flavours!

Cotswold Premium Lager

I am malt lead lager with toasted grain flavours & only a hint of sweetness. I was made without any nasty additives or preservatives so I shouldn't give you a headache!

Cotswold Haus Lager

I am the Cotswold go-to Session lager; easy drinking with hints of tropical fruits and elderflower. I am cold stored for at least four weeks and I don't contain any nasties

Cotswold

BREW CO

We started brewing lager before it was cool, back in the days when it was called "Euro fizz" or "Disco fizz". We are a fun, quirky company who love what we do and are proud of being independent and family owned; it means that our outlook is as fresh and undiluted as our beers. We brew lager the way that German and Belgian breweries have been doing for centuries, using only four ingredients (water, hops, malted barley and yeast). We don't chuck in any awful additives, pesky preservatives or even pasteurise our beer, as they ruin its great flavour. This means that our beer should be kept chilled and consumed quickly (this is referring to the timing of consumption rather than the speed of drinking!).

Cotswold Lager

I am a dry hopped lager which is light in colour & ABV but full in hop flavour. Like all Cotswold beers I have not been pasteurised and am only made from hops, malt, water and yeast, so you shouldn't feel any ill effects!

Cotswold Dark Lager

This is the beverage equivalent of comfort food. Dark and warmly inviting with all the bitterness and hop flavours of a proper 'grown up' lager it also possess a subtle chocolate and toffee flavour that makes it very moreish.

Cotswold IPA

I was born out of our brewer's love for big tasting American keg IPAs. I have full-on citrus hop flavours but don't be too worried - my bitterness is counter-balanced by big sugars & a smooth finish.

The "6X" dates back to the markings on the barrels in the Brewery. Different beers have different markings and the beer with 6 X's on it was our most popular.

Great cider represents a timeless joy to Ben and Steph Culpin from Apple County. They make real cider and perry from their orchards and local orchards on lush, rolling Monmouthshire hills. Their approach to cider-making is reverential, akin to winemaking. Each cider is made from a single bitter-sweet apple variety using 100% freshly pressed juice. They develop distinguished character and complex flavours through a long, slow fermentation process. Multi-award winning Apple County is putting Monmouthshire on the world cider map – winning a prestigious Great Taste Awards 'Golden Fork' as overall best food and drink product from Wales! Discover a taste of Apple County for yourself by simply opening a bottle.

Never a company to stand still, Bath Ales has grown steadily and is now complemented by a brewery shop and a thriving estate of pubs in the West of England. ❏ Dry Cider

A deep gold, slightly sparkling, dry cider with a fruity aroma of traditional bitter sweet apple with spice and peaty overtones.

❏ Medium Cider

A golden, well balanced, slightly sparkling cider with caramel, butterscotch and dried fruit aromas.

HOGAN'S CIDER

In Autumn 1985, I was introduced by John Stewart, a neighbour and early eco-warrior, to the art of cider making using locally harvested cider apples. Opening the barrel for the first taste in early Spring was an eagerly anticipated magical experience. The cider apple was transformed into a delicious and moreish drink. I continued this tradition, perfecting the process until 11 years ago I plucked up the courage to take my cider to Stratford Farmers market and the rest as they say is history. Don't be fooled by a lot of the cider you see, our cider and perry is fermented from 100% fresh pressed English cider apples and perry pears grown in the Herefordshire, Worcestershire and Gloucestershire countryside and contains nothing that doesn't need to be there. Enjoy!

❏ Vintage Perry

A classic perry in every sense of the word, Hogan's use only 100% English perry pears to produce their Vintage Perry.

❏ Killer Sharp

A fresh, earthy and rebellious cider with a fierce and tangy soured apple edge. This is a feisty but proper cider with a twist for those brave enough to try something different.

❏ French Revelation

Our Breton style cider is smooth, velvety and oh so richly flavoursome. A wild, fruity and mature cider with a naturally rich bronze colour.

🍷 Pearson's Dry Cider

A clear, lightly sparkling cider. It gets its distinctive 'bite' from the Redstreaks, while the vintage quality of Harry Master's & Yarlington Mill give it a rounded, well balanced finish.

🍷 Pearson's Medium Dry Cider

A clear, lightly sparkling intensely appley cider made from 100% fresh pressed juice using only vintage quality bittersweet cider apples.

🍷 Pearson's Medium Cider

A lightly sparkling, intensely appley clear cider. It has a light fruity aroma and great balance between sweetness, acidity and tannins.

Pearson's ciders are handmade, slowly, in small batches using traditional methods. Only the finest vintage cider apples are used which we mill and press ourselves. The fresh pressed juice is fermented using carefully selected yeasts before the cider is allowed to mature slowly throughout the winter. Around the start of the summer, and only once it is ready, it is blended and bottled. We take our time every step of the way, and care passionately about the cider that we make.

🍷 Vintage Cider

A lightly sparkling full bodied and well balanced medium cider.

Award Winning cider makers since 1920! As craft cider makers we strive to create the most interesting and exciting ciders we can, by firstly thinking a little differently, and secondly by attempting to combine the rules and traditions of farm house ciders with a modern approach to craft fermentation and aging. This means keeping things as simple as possible - using the very best fresh apples, small batch techniques, wild yeasts and 100% juice. The result is a beautiful range of distinctive whole juice ciders, full of character, charm and flavour.

Cotswold Cider

I know this is crazy but I just taste of apples! I am a traditional cloudy Farmhouse cider made with 100% British apple juice (no concentrate for me!). I am lightly sparkling so won't make you feel bloated!

Cotswold

BREW CO

We started brewing lager before it was cool, back in the days when it was called "Euro fizz" or "Disco fizz". We are a fun, quirky company who love what we do and are proud of being independent and family owned; it means that our outlook is as fresh and undiluted as our beers. We brew lager the way that German and Belgian breweries have been doing for centuries, using only four ingredients (water, hops, malted barley and yeast). We don't chuck in any awful additives, pesky preservatives or even pasteurise our beer, as they ruin its great flavour. This means that our beer should be kept chilled and consumed quickly (this is referring to the timing of consumption rather than the speed of drinking!).

🍷 Willy's Cider

Classically refined, crisp and fruity.

The WONKY BARN

Born out of curiosity Willy is now ready to show his cider to the world. Starting with the apples that are grown on his family farm in Ledbury, Willy and the farm hands scrub and wash the apples then fresh press to extract the juice. Pips and stalks are left in to ensure the pure apple taste. The fresh apple juice, taken from over 18 traditional bittersweet cider varieties and is then fermented using British yeast from the old oak vats that clutter the farm.
